Product Designer

SOS Express | January, 2025 - August, 2025 | Abuja, Nigeria

- Collaborated with engineering, product, and operations teams across 3 time zones to build and maintain a scalable design system for 3 logistics platforms, increasing design consistency and reducing engineering cycles by 34%.
- Led user research with 25+ couriers and customers, conducting usability tests that informed mobile-first redesign and improved user satisfaction by 25%.
- Designed and shipped PWAs for courier, business, and user portals supporting 10,000+ daily active users, partnering with frontend engineers to ensure technical feasibility and optimal performance.
- Simplified delivery workflows through journey mapping and iterative testing, enabling direct courier-customer communication that reduced delivery time by 15%

Product Designer/ UX Strategist

Alveum | December, 2024 - March, 2025 | Ilorin, Nigeria

- Led cross-functional workshops with warehouse managers, developers, and stakeholders to co-create a 0-to-1 design system for warehouse management platform, reducing design-to-development handoff time by 40%.
- Designed SaaS application for retail and bulk sales businesses, managing inventory tracking for 50+ SKUs and improving sales documentation accuracy by 30%.
- Created comprehensive design documentation with 40+ component variations, eliminating 35% of recurring design-engineering sync meetings and providing reusable system guide.
- Conducted 10+ stakeholder interviews to translate complex warehouse operations into intuitive digital workflows.

Product owner/Founder

Bento School Management System | December, 2023 - February, 2025

- Founded and shipped school management SaaS adopted by 3 Nigerian schools (200+ students), digitizing registration and assessment processes and reducing paperwork inefficiencies by 70%
- Led full product lifecycle from user research through design and development, conducting 20+ interviews with teachers and administrators to identify pain points.
- Designed and implemented responsive web interface using Figma and modern web technologies.
- Analyzed unmoderated user testing sessions to understand real-world interaction patterns and iterate on designs.

Product Designer

Cerebro Hive | October, 2023 - November, 2023 | Enugu, Nigeria

- Designed the web app interface and design system for an admin portal supporting student documentation and international payments.
- Conducted user interviews and usability tests, uncovering roadblocks that informed redesigns, improving task completion rates by 20%.

UI/UX Designer

Cendmate | February, 2023 - March, 2023 | Vancouver, Canada

- Led end-to-end design for financial mobile application simplifying cross-border money transfers between Canada and West Africa
- Collaborated with product and engineering teams to deliver personas, journey maps, wireframes, and interactive prototypes tested with 20+ users
- Conducted 3 rounds of usability testing that validated core transfer flow, ensuring 95% task completion rate

Web Designer, UI/UX Designer

Monievend | May, 2022 - July, 2023 | Lagos, Nigeria

- Designed company website and client portal for POS transactions, increasing SME adoption by 40% in first 6 months.
- Partnered with frontend and backend engineers to align UI/UX with technical constraints, reducing frontend bugs by 30% and improving development velocity.
- Created responsive designs supporting 5,000+ monthly transactions.

Front End Developer and UI/UX Designer

JJAIBOT | August, 2020 - February, 2021 | Cyprus

- Collaborated with data scientists to design remote weather prediction software for wildfire tracking used by emergency response teams.
- Built responsive frontend interfaces using HTML, CSS, and JavaScript.
- Created wireframes and low-fidelity prototypes to validate navigation flows, improving task completion by 25%.

Personal projects

File Search using Large Language Models | July, 2024 - August, 2024

- Designed file management application integrating natural language processing and image recognition, reducing search time by 40% across 100+ test files.
- Created extended mode leveraging server-based recognition for 85% accuracy improvement.
- Conducted usability testing with 15+ users to validate search effectiveness

Swimming Goggles For Visually Impaired | January, 2024 - June, 2024

- Researched prescription eyewear market gaps through 25+ interviews with visually impaired individuals, identifying accessibility barriers in public pools and beaches.
- Designed swimming goggles with integrated prescription lenses, conducting focus groups with users across different prescription strengths.
- Built working prototype with airtight sealing and temple harness, tested with 10+ users with corrective eyewear.

Core Competencies

Research & testing:

User interviews, A/B testing, usability testing, journey mapping, personas.

Design:

Design systems, information architecture, wireframing & prototyping, accessibility, inclusive design, mobile-first design.

Tools:

Figma, Vercel (v0), ChatGPT, Bolt.new, Framer, Webflow, Phase, Figma Make (AI builder).

Education

- Computer Science | Nigerian Defence Academy | 2021 – 2022.
- University of Ilorin | Geology and Mineral Sciences | 2014 – 2019.
- Adobe Design Essentials | Udemy | 2021
